

## *Ethnomusicology*

Upon completion of this study program, students acquire competences to:

- acquire knowledge, skills of various musical disciplines as well as the methods of scientific research in order to pursue their careers in ethnomusicology on a more professional level;
- teach all music subjects in primary schools of general education and primary and secondary music schools - the same or similar subjects that they had at undergraduate and master studies – provided that they chose the appropriate elective subjects (Analysis of a Musical Work 1 and 2, Methods of Teaching Music 3, Methods of Teaching Solfeggio 3, Teaching Practice 2, etc.)
- prepare and have concerts of traditional music in schools and other cultural institutions;
- creatively participate in the selection of repertoire, leading the group of singers and improving of the quality of group of singers and folk ensembles;
- actively participate in the presentation, revitalization and promotion of vocal, instrumental and vocal-instrumental traditional music within the wider social environment;
- work in museums and archives;
- work in libraries;
- work at radio and television programs (for elective courses: Music Recording Basics 1, Music Production Basics 1);
- continue their training on the third level of academic studies.

The acquired theoretical and practical knowledge of ethnomusicology, and music in general, will make a good foundation for the needed competences to work in the above mentioned institutions, but also for the continuation of students' education and broadening of their knowledge.

	Code	Subject	Type	ECTS	Lectures	Practice	Year
1.	09.MDIU4	History of Art 4	E	3	30	15	I
